

2.5 NVG   
OPHTHALMIC

## THE MOST CUSTOM-MADE SOLUTION

It is the most custom-made solution :

- Pupillary distance
- Prescription
- Coating
- Multifocal lenses
- Face shape

## A LARGE VARIETY

The 2.5 ophthalmic range gathers three subcategories of product, all flexible from a simplified pin hinge to the most complex structure combining TR90 and stainless steel. It allows a large choice in terms of shapes, colours, designs and it's the closest range to the classic optical frame ranges.

## WHAT ARE OPHTHALMIC EYEGASSES?

---

- Any spherical or cylinder can be mounted
- Lenses can be adapted to the exact PD measurement
- Frames can be bent and heated

## FOR WHO?

---

- Hyperopic, Myopic, Presbyopic, Astigmat
- High prescription
- People who want customized lenses: photochromic, progressive...

## USAGES?

- Indoor and outdoor
- Near sighted and far sighted
- Progressive lenses
- Plano blue cut

# OPHTHALMIC OG

## GOOD

The new generation of wearers requires lighter products, with nice designs and always at a more affordable price. To satisfy this need, 2.5 NVG launched the new “OG” range.

These products are 14 grams light and have a comfortable fit thanks to the TR90 material and the universal nose pad. OG is the cheaper range thanks to simplified designs (no spring hinge).

Five modern and universal designs will be declined in three or four colours each.

### TECHNICAL FEATURES

	FRAMES	LENSES
MATERIAL	TR 90 frame	Custom made C39, 1,56,1.6
DESIGN	Simplified Pin Hinge	All the designs possible, spherical, bifocal, multifocal
POWER		All power and cylinder possible
PD		Adapted to wearer's exact measurement

# OPH

## BETTER

“OPH” is the better range of the ophthalmic offer. It allies quality, style and comfort. The integrated spring hinges will allow the frames to fit a large diversity of face shapes.

The stylish designs are improved and up to date.

Eventually, gathering 24 designs declined in 62 models, this large product range will satisfy all the ages, gender and face shapes.

DESIGN	<ul style="list-style-type: none"><li>• 24 shapes with spring hinge</li><li>• Armed temples</li></ul>	
POWER		All powers and cylinders possible
PD		Adapted to wearer's exact measurement

# OPHTHALMIC OT ULTRALIGHT

## BEST

For the higher correction, the lenses can be very heavy and lead to a high discomfort, reason why 2.5 NVG has launched the Ultra Light (OT) range.

OT is the “best” ophthalmic range: perfect for all vision needs, this collection ensures style, comfort and flexibility. Two times lighter than the average frames, the wearer will experience a real cosiness while wearing it. The Ultra Light range is also trendy thanks to its 8 designs declined in two colours each.
